

The Environment Agency and Climate Change

Michael Lord

Senior Advisor, Climate Change

We are at the frontline of climate change

➔ Flood risk

➔ Coastal erosion

➔ Water resources

➔ Wildlife and habitats

Flood Risk

- ➔ 1 in 6 homes in England are currently at risk of flooding
- ➔ Climate change could increase the risk

Coastal Erosion

Environment
Agency

- ➔ 1m sea level rise by 2100
- ➔ Up to 1.9m sea level rise possible.

Changing climate – potential impacts on river flow

February

September

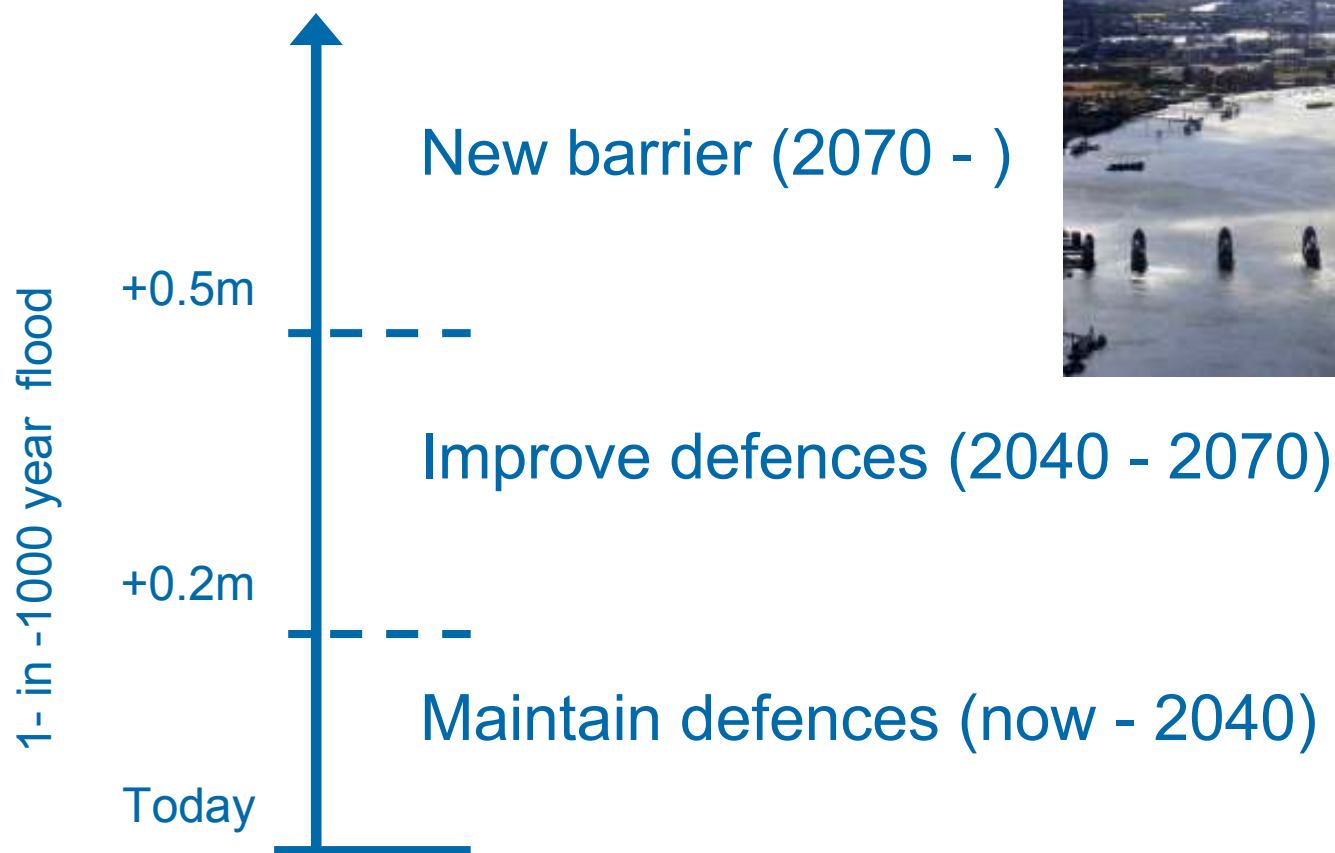

- ➔ Overall decrease in river flows
- ➔ Greatest decreases in summer and on hard rock catchments

Infrastructure at risk

Significant chance ■ Moderate chance ■ Low chance ■

Our Thames Estuary adaptive approach

The Adapting to Climate Change Programme

➔ Information and advice

➔ Capacity building

➔ Working in Partnership

A tailored approach

- ➔ Business and Economy
- ➔ Infrastructure
- ➔ Built Environment

- ➔ Health and Wellbeing
- ➔ Natural Environment
- ➔ Local Government

How can we help you and how can you help us?
